

May 2, 1983

Good Morning,

We cordially invite you and your associates to attend a conference on managing change through financial application software.

If you are able to respond to the continuous changes that impact your governmental environment, you can more effectively plan for success.

MSA provides application software products that will help you manage change and plan for the future.

This conference on managing change through software will address the topics of mainframe system integration, online productivity aids, decision support systems, online interaction, and micro/mainframe integration. In addition, individual product sessions will focus on your specific application needs.

Whether you are just starting to look for software solutions, or are investigating ways to make application software work better at your organization, this conference is for you.

You are invited to join us at the LOEWS L'ENFANT PLAZA on JUNE 2, 1983, for a complimentary half-day workshop on decision support software, its viability and availability for government accounting and resource management. The workshops will commence promptly at 9:00 A.M., with coffee at 8:30 A.M. A complimentary lunch will also be provided at the close of the sessions.

An outline of topics to be covered is enclosed. Please complete the registration form and return it to the address listed on the form, or give Sandy Prillaman a call at (703) 836-3959, and we will reserve a place for you. Perhaps this will be the best investment of your time for 1983! We sincerely hope so, and will be looking forward to meeting with you. Please register early, as attendance will be limited.

Take advantage of this opportunity to meet the MSA people who stand behind the best quality software products in the world.

Sincerely,	
Manager	
Federal Systems Div	ision
